

Sonu Kumar Kushwaha

Linux System Administrator | RHEL | SUSE | Automation | L2/L3 Support

Greater Noida, India | sonu.kushwaha@wipro.com

Professional Summary

Linux Administrator with 4+ years of experience in RHEL & SUSE environments supporting enterprise production systems. Expertise in CPU, memory, swap tuning, patching, server lifecycle, automation using Ansible, and end to end incident management. Proven track record of maintaining zero backlog, improving system performance, and ensuring stability.

Core Skills

Linux (RHEL, SUSE) | CPU/Memory/Swap Tuning | LVM | Patching (JetPatch) | Ansible | Bash | OpsRamp | Cron Jobs | Log Rotation | SSSD | Server Build & Decommission | Vulnerability Remediation | CrowdStrike | VM Upgrade

Professional Experience

Linux System Administrator (L2/L3) – Wipro Limited (Apr 2022 – Present)

- Managed CPU, memory, and swap for optimal performance
- Performed LVM tasks: resize, mount, unmount, and create mount points
- Executed server build, upgrade, and decommissioning
- Conducted daily health checks and handled OpsRamp alerts
- Automated tasks using Ansible, including OS patching
- Managed cron jobs for scheduled tasks
- Handled log rotation, log management, and disk cleanup
- Configured and managed SSSD and user access
- Troubleshot SUSE and RHEL production issues
- Generated SOS reports for analysis and RCA
- Performed cluster freeze/unfreeze during maintenance
- Executed patching using JetPatch (pre-check, run, validate)
- Supported server and VM upgrades, including RMT setup
- Installed and troubleshot CrowdStrike agents
- Performed vulnerability fixes and compliance activities
- Managed filesystem resizing and memory changes
